President's message by Pauline Bruno

"If you can't win through the electoral process, push your agenda through the court system"

That's the way the Left has always operated - and it's not a new strategy.

In 1937, President Franklin D. Roosevelt proposed a legislative initiative called the Judicial Procedures Reform Bill. The plan behind the bill was to obtain rulings favorable to his New Deal, many of which the Supreme Court had deemed unconstitutional. He wanted to change the make-up of the Court through the appointment of additional justices. The bill stated that the President could appoint another justice to the Court (up to six) for every member of the Court over the age of 70. FDR even devoted one of his Fireside Chats to this purpose.

This is "Stacking the Court," something the Democrats are looking to do now.

The problem is NOT in the Court. This is an attempt to rig the system in the Democrats' favor by any means necessary. These ideas are not aimed at changing the country for the better, but tipping the scales to their liking. The principles and procedures dealing with the Court have been in place since 1869.

This "Stacking the Court" policy was extremely short-lived in FDR's time. People believed the Court was "sanctified" and there should be no interference. Let's hope our fellow Americans believe the same thing today.

God bless our President and our country.

Pauline
